# Ultra manoeuvrable, Gas 24" makes straightline maintenance a breeze

Designed specially for areas where speed is critical, Gas 24" delivers the high productivity results you need.

Smooth, quiet operation makes creating and maintaining that 'wet look' shine easier and faster than you thought possible.

## Contour-following system for an even finish

Consistent, maximum floor contact is achieved with the flexible pad holder. The pad constantly follows the contours of the floor surface, ensuring a smooth, dust-free floor every time.

(NOTE: Gas 24" is also available with a brush)

## Ultra-reliable Honda or Kawasaki V-Twin Power

The 17 horsepower Kawasaki motor or the 15 horsepower Honda ensures consistent power delivery to the pads for an even, patch-free finish.

Key electric start fires up every time.

## Simply designed to be simply reliable ...and serviced faster

The 60 cm tiltback base and belt drive system makes for easy access to the belt, drive pulley and vacuum inlet. No high service labour costs. Longer life.

## Adjustable contoured handle with safety triggers

Ensures correct posture and reduced fatigue. Smoother, more comfortable operation, longer.

## Designed here, built here by Australians for Australian conditions

No waiting for imported parts and that means no costly downtime. Parts available all over Australia.
