

LENCIA

SPRAY AND FORGET, NATURAL BATHROOM CLEANER CONCENTRATE *WITH Natural Mildewicide/Mouldicide

Just think, you'll never need to scrub your shower or bath ever again. Why? Because Citrus Resources has developed an amazing breakthrough. A natural bathroom cleaner that **kills mildew and mould** as it cleans off bathroom scum and grime without scrubbing, wiping or even rinsing.

How does it work? Because you don't.

By mixing with the water droplets after you use the shower or bath, Lencia spreads out a layer of super wetting agents and mild plant acids that dissolve bathroom scum and calcium build-up. Natural non-toxic citrus and plant extracts (phytochemicals) kill mould and mildew spores as well as prevent regrowth. You will never have mould again when the shower or bath is cleaned daily with LENCIA.

Lencia's Breakthrough

- No scrubbing
- No rinsing
- No wiping
- No squeegeeing
- Incredible economy of use - under 60c per litre.

Non Toxic, Hypo Allergenic

Because all natural based ingredients are used, Lencia is safer than chlorinated, quaternary and other alkaline or acid based cleaners. Unlike chlorine it can't rust stainless steel or bleach your clothes or have toxic fumes. Many people try anything to remove scum and mildew. Bleaches, poisons, harsh abrasives and creme cleaners. They only work for a while. **Lencia works all the time** without scrubbing or rinsing.

Super Concentrate, Sprayable Formulation

Citrus Resources first introduced Zest, a thickened washroom cleaner made from citrus extracts that could be diluted for maintenance cleaning. Lencia goes one step further by introducing a super concentrate that may be **sprayed at 1 to 10 for daily cleaning and mould removal**. Lencia may be sprayed with a foaming trigger spray rather than squirted onto the surface. Because it is non-toxic it doesn't irritate sensitive noses at this concentration. Hospitals can go back to foam trigger spraying with complete safety.

Fresh Natural Aroma

Containing citrus peel extracts, reminiscent of mandarins it gives your bathroom a lingering freshness all day.

Directions

Spray Daily - Save Time*

For Hospitality, Hospitals and Domestic users, **there's nothing on the market that is easier to use or more effective.** Just spray the shower and bath and leave it. No streaks no scum and no mildew **provided** it is used daily. The flushing action actually washes the scum away.

In fact if you're not in a hurry there's no need for an initial shock treatment. Lencia will bring back the lustre and new appearance after a few days of spraying.

Shock Treatment

For those wanting an immediate result, use Lencia (diluted 1 to 1 with water) by squirting or pouring onto a cloth or white pad and wiping over the surface, allow to stand for a few minutes then pressure flush off. On extremely soiled surfaces you may need to scrub the grouting to remove black deposits. Leave Lencia on the surface for at least 10 minutes prior to rinsing.

Toilets and Wash Basins Everything in the Bathroom

Lencia doesn't just clean the shower and bath. Spray your hand basins, taps, toilets, vanity units and urinals. Just spray wait and rinse for a sparkling clean mildew free shiny finish (scrubbing may be necessary on rusty or heavily soiled toilet bowls). Rinse toilet seats after cleaning.

Walls and Ceilings

Using on painted bathroom walls above the tile line removes mildew and kills the spores that causes mildew to regrow. Using it regularly will keep mildew away for good.

Floor Tiles

Mopping bathroom ceramic floors was never easier. Dilute Lencia concentrate 1 to 100 (approximately 100MLS per 10LTR bucket) your floor will be streak free and the grouting will stay white.

Dilution Centre Directions

Lencia is designed to dilute accurately in wall mounted dispensers directly into specially printed Lencia dispenser bottles.

Non-Toxic, Biodegradable, Safe

Natural plant extracts that take the place of toxic mildewicides, bleaches and dangerous chemical disinfectants would appear to have an exciting future. Lencia is the world's first cleaning product to use non-toxic phytochemicals to kill mould, mildew and algae as well as to prevent regrowth. Lencia's activity is "anti-microbial"; it kills the fungus that can cause athletes foot and tinea.

The majority of mildewicides and disinfectants used in bathrooms are toxic and non-biodegradable. **Lencia is highly biodegradable, non toxic** and can be safely be used in septic systems. Lencia exceeds Australian and tougher European biodegradability standards.

Do's and Don'ts

Because Lencia is mildly acidic it **must not be used** on Marble, Terrazzo or Granite surfaces as this will dull the surface over time. Pre-test on brass taps to ensure coating is not cracked or chipped. Test painted surfaces prior to use.

SLIPPERY SURFACES

When body oils and medications are mixed with soap scum a slippery condition can be experienced in the bath or shower. Lencia removes all traces of these hazards and reduces the chance of slip falls.

Where there is no slip protection in the shower and it is to be used by the elderly or infirmed **Lencia should be rinsed from the surface** after a few minutes contact time.
