

# ORANGE SQUIRT

SPRAY AND WIPE CLEANER/DEGREASER CONCENTRATE  
WITH D-LIMONENE AND VEGETABLE BASED DETERGENTS

## **The First Pleasant to use - Tough Job Cleaner**

It's always the same way - use a strong degreasing cleaner or spray and wipe cleaner and the same thing always happens - you nearly get bowled over with the fumes.

What are these "fumes"? They are usually "glycol ether" or "petroleum distillate" solvents or fumes from free caustic.

This can never happen with ORANGE SQUIRT All Natural, Spray and Wipe Cleaner because its list of all natural ingredients are safe from harsh irritants to the skin, as well as being more biodegradable than petroleum products.

## **Cleaning Performance - We Don't Hide Our Ingredients**

CITRUS RESOURCES have been able to break through the performance barrier whilst still utilising naturally derived ingredients.

Greasy soils - Orange oil solvent (D-Limonene), pine and sugar alcohol softens and solubilises oily soils; even hardened fats are lifted effectively.

General dirt, grime and vegetable matter - These are wet-out and dislodged from the surface by detergency which is assisted by your mopping or wiping action. We use the finest coconut oil and palm oil derived detergents to foam away grime and rinse shiny bright.

Water softening is taken care of with citrates. These help the detergent work better and help keep the oil in suspension and rinse clean away - no phosphates, EDTA's or NTA's are used.

## **Types of Soilage Removed**

Carbonaceous soils of baked on food deposits that normally would require caustics or solvent and petroleum emulsion cleaners. These soils are normally found in kitchens and food industry applications or even fire damaged cleanups.

Oily soils - whether you are cleaning up simple finger marks on walls or a garage floor or a grubby mining camp lunch room - all soils are off in one wipe.

Protein stains and spills of hardened food deposits found in a vegetable market or in a garbage compactor - you can mop it, wipe it, brush it or foam apply it. It gives a magic result from the power of the orange.

In fact, you can do just about everything with this product.

### **Dilutions**

Heavy carbon based soils - like chicken rotisseries, stoves, etc. Use undiluted and leave soaked for at least (5) five minutes before agitation with a scouring pad.

Heavy fatty, greasy deposits and soap scum found in shower blocks, kitchens, mining camps, and engineering works.

### **General Spray & Wipe Cleaning**

Dilute 1 part cleaner to 10 parts water (50mls to 500mls water). Apply by refillable trigger spray - it instantly dissolves ink stains and general grime on painted and unpainted vitreous surfaces without smearing, even glass. Because it contains no petroleum solvents it may be used on plastics, clear acrylic sheeting, polycarbonates without fear of cracking or hazing.

### **Mopping and Scrubbing**

Dilute 1 part cleaner to 50 water (200ml per 10ltr) for concrete and tiled floors, unsealed vinyl in kitchens, bathrooms, engineering works, shops, etc.

### **Light Duty Cleaning**

Dilute 1 part cleaner to 100 parts water. Maintenance automatic scrubbing of shopping malls on tile and stone, general maintenance washing and cleaning.

**\*\*\*Use warm or hot water to improve greasy soil removal.**

### **Note**

This product contains no artificial colouring or perfume. It contains no preservatives that would otherwise slow its biodegradability. Please keep lid tightly closed when not in use and store drums in a cool place.
