

HALO (FAST DRY)

SMEAR FREE, GLASS AND SHINY SURFACE CLEANER
GREAT DEODORISING FRAGRANCE

Product Background

We've been asked to produce the fastest drying window cleaner so that you can speed up the task of cleaning windows, shiny painted, laminated and chrome surfaces. Normal window cleaners take so long to dry, you have to wait. Time costs money.

Streaks and smears are another complaint, so too are the problems of strong ammonia and sour chemical smells. HALO (FAST DRY) doesn't have any of these complaints - yet it cuts through grease, nicotine and food based spills in a flash.

No Residue

Surfaces cleaned with HALO (FAST DRY) stay cleaner longer and reduce static cling because there is no residue to attract dirt and dust. You will get crystal clear "HALO" results every time.

Safe on Tinted Glass

Because HALO (FAST DRY) is ammonia free it's perfectly safe on tinted glass or film, even in the car. It's ideal for sensitive equipment like computers, X Rays, Navigation and TV & Stereo plastics. Fine optical and medical equipment can safely be cleaned with HALO (FAST DRY).

Halo (FAST DRY) is Ideal for General Cleaning

Tabletops and benches	Mirrors and glass	Refrigerators
Desks and chairs	Fixtures and fittings	Automotive
Chrome and stainless	Aluminium window frames	Showcases

Directions: Use HALO (FAST DRY) Spray Dispenser

Spray lightly over the surface to be cleaned in sweeping strokes. Agitate with a terry towelling cloth or paper towel until the product disappears. Turn the cloth to an unused section (or use a fresh one) for a final wipe. A circular motion removes the most dirt and grime.

New Product

HALO is now available in a ready to use 750ml spray and squirt bottle.

Safety Advice

Contains Isopropyl Alcohol, do not spray near eyes or face. Ensure ventilation is adequate prior to use.

Skin	HALO (FAST DRY) is not a skin irritant.
Eyes	Moderate irritant

First Aid

If Swallowed	Do NOT induce vomiting. Give one to two glasses of water. Obtain medical advice.
Skin	Dry wipe skin.
Inhalation	Remove from further exposure. If dizziness or nauseous seek immediate medical advice.

* Do it yourself applied automotive tint film cannot withstand long term use of HALO Fast Dry. The quality of this film is usually below the standard of quality of professionally applied/factory applied tint film.
