

ODABAN E

ODOUR ABSORBER CONCENTRATE
WITH SPICE RESIDUAL

Product Concept

To remove putrid and "wet dog" odours from carpet has always been difficult due to the many thousands of odour types.

ODABAN E has been specifically formulated and is one of the very few chemicals available that actually combines with unpleasant odours to create a non-odour. Even rotting food, smoke, pet's urine and sewerage can be deodorized with ODABAN E with only a pleasant fresh spicy aroma left behind.

Directions

CARPET: Extraction clean and remove as much of the odour source as possible. Spray at 1 to 5 dilution lightly over affected area and agitate in. Alternatively, for persistent odours from pet urine or similar odours, undiluted ODABAN E may be injected into carpet underlay by syringe. Do not rinse.

If odour source cannot be found, add ODABAN E directly to machine solution tank and clean in the normal manner. Dilute ODABAN E 1 to 50 parts water in the tank.

HARD FLOORS: Dilute ODABAN E 1 part to 50 parts water and mop on contaminated area.

SPRAYING: Dilute ODABAN E 1 part to 5 parts water and mist into air or directly onto contamination.

Not considered hazardous according to criteria of Worksafe Australia

High Technology Chemistry and Cleaning Systems for the Carpet Maintenance and Sanitation Industries
